

# SHUBHAM MEENA

## MERN WEB DEVELOPER

As a dedicated full-time web developer since 2022, I bring a blend of professional experience and a six-month internship background. Specializing in MERN stack development, I have honed my skills through hands-on projects and a proactive approach to learning. I am poised to contribute my knowledge and skills to new challenges, fostering growth and making meaningful contributions to the dynamic field of web development.

### SKILLS

	REACT.JS	<div></div>
	JAVASCRIPT	<div></div>
	HTML5	<div></div>
	CSS	<div></div>
	GIT/GITHUB	<div></div>
	REDUX	<div></div>
	BOOTSTRAP	<div></div>
	NEXT JS	<div></div>
	NODE JS	<div></div>
	MONGODB	<div></div>
	EXPRESS	<div></div>
	POSTMAN	<div></div>
	TAILWIND	<div></div>
	FIREBASE	<div></div>

### EDUCATION

#### BACHELOR OF SCIENCE

Bachelor of science in mathematics

Bundelkhand University

#### INTERMEDIATE

Computer science with Blue Java one of the subjects

Cathedral College , Jhansi (ICSE board)

### EXPERIENCE

#### INTERNSHIPS TRAINEE

Andronium Solution | Sep 2022- Feb 2023

- Designing and developing responsive websites, Projects focusing on smooth user experience, implementing and working on some CSS frameworks like tailwind , Bootstrap and Material UI.
- Learned to create single page web applications
- Used customized hook for reusing the functions on different components,
- Build frontend projects using react and redux toolkit using data from the API of backend live servers
- Worked under a team to create a new web application, increasing user engagement

#### FRONTEND DEVELOPER

Dazzler Software Pvt Ltd | July 2023- Present

- Frontend development using Javascript, React.Js
- Expertise in JAVASCRIPT and React.Js to develop the SAP on client demand
- Used to develop SAP and webpages with JavaScript and React for creating interactive UI's using One-way data flow, Virtual DOM, J.S.X, React concepts.
- Implemented shimmer effects to enhance user experience during data loading
- Utilizing React Router DOM for seamless navigation between different pages
- Implemented asynchronous programming with async/await for efficient data fetching and filtering datas from API responses.

### PROJECTS

#### 1. LIVE WEATHER APP [Deployed URL](#)

- Live search Weather App using react functional components,React Hooks, React fetch API

#### 2. PORTFOLIO [Deployed URL](#)

- As a skilled React frontend developer, my portfolio showcases my expertise in creating engaging and interactive user interfaces. With a keen eye for design, efficient coding practices, and a passion for delivering seamless user experiences, my portfolio highlights my dedication to creating cutting-edge web applications

### 3. BAKEHUT FOOD ORDERING APP

 [Deployed URL](#) 

- BakeHut is a React.js-based food ordering and delivery app with four components: home, about, contact, and login pages. It has an intuitive add-to-cart feature, offline functionality, shimmer effect, live API fetching, seamless navigation via React Router DOM, Redux Toolkit for state management, and Parcel for optimized code delivery. It offers a robust and user-friendly experience.

### 4. BBC NEWS APP [Deployed URL](#)

- I crafted a BBC News clone with vanilla JavaScript, leveraging a live backend news API. Employing promises, async-await, and map functions, I dynamically generated categorized news cards for sports, politics, entertainment, and international topics. The project boasts a user-friendly search feature, empowering users to effortlessly discover news tailored to their interests.

### 5. SPOTIFY MUSIC APP [Deployed URL](#)

- I developed a Spotify music app using vanilla JavaScript, utilizing a custom JSON file as the data source. The application features essential controls like play/pause buttons, volume rockers, and a dynamic song search functionality. Users can create personalized playlists, distinguishing between Hindi and English tracks, enhancing their music exploration experience.

### 6. MINTRA FASHION E-COMMERCE

- I developed a Mintra fashion cart clone using vanilla JavaScript, featuring custom JSON data for trending clothing with price, brand, and other details. Utilizing Bootstrap for CSS, the fully responsive webpage caters to both mobile and computer users. An "Add to Cart" section facilitates the addition of items to the cart page.

### 7. NETFLIX CLONE [Deployed URL](#)

- I created a Netflix clone using React.js, incorporating a user signup/login page through Firebase. The home page features trending Netflix videos via TMDB APIs, enhancing user access. A search page utilizes the OPENAI API for detailed movie searches. Tailwind CSS ensures an interactive and responsive design throughout the application.

### LANGUAGES

Hindi : Native

English : Intermediate
